

Aditya Goel

IRM2016003@iiita.ac.in

EDUCATION

IIIT - ALLAHABAD

Pre-Final Year

B.Tech in Information Technology
Dual Degree M.Tech in IT (Robotics)
Cum. GPA: 8.56

JPHS, JAIPUR

High School
Grad. May 2016
Percentage: 95.6%

COURSEWORK

UNDERGRADUATE

Computer Vision
Data Mining and Warehouse
Image and Visual Processing
Artificial Intelligence
Software Engineering
Convex Optimization
Database Management System
Operating Systems
Computer Networks

SKILLS

PROGRAMMING

Languages

• Python • PySpark • Scala
• Java • C++

Development Stacks

• Django (Python) • ReactJS
• Netbeans (Java)

Data Science Libraries

• Tensorflow • Keras • Matplotlib
• Seaborn • Pandas • Scikit

Data Science Tools

• Jupyter Labs • Hadoop
• Hive • Matlab

EXPERIENCE

DATA SCIENCE INTERN | JIO BIG DATA ANALYTICS

May 2019 - Now | Reliance Jio, Mumbai

- Working under guidance of Dr. Shailesh Kumar on "Formation of Logical Feature Communities".
- Responsible for implementing community detection model from scratch and integrating it with Jio Data Science Platform.
- Built a Data Agnostic Model that automatically clean fuzzy data and prevents data leakage.

DEEP LEARNING INTERN | DETECTION IN CANCER IMAGES

Feb 2019 - April 2019 | LYTiQ GmbH, Germany (Remote)

- Developed a model for calculating the count of mitotic nuclei in breast cancer histological images.
- Improved model using the latest fastai library and then hyper-parameter tuning.
- ICPR 2012 and 2014 datasets were used for training of the model.

PUBLICATIONS

MULTI-MODAL SYSTEM IN HUMANOID ROBOTS

Robotics and Machine Intelligence Lab, IIIT-A

- Designed a fusion system model which inputs both speech and gestures as mode of expression of command for a robot.
- Primary aim is to build a system that would allow robots to communicate effectively with differently-abled people.
- Real time: Commands are followed by the robot with minimum latency.
- Proposed research submitted under RO-MAN 2019 Conference.

PROJECTS

EXPERT SYSTEM | AI CAREER GUIDANCE EXPERT SYSTEM

October 2018 - Nov 2018

- Developed an expert system that determines Myers-Briggs Type of a person.
- The system suggests relevant career options on the basis of personality and academic background through a questionnaire.
- Modelled and coded the entire system.

VIRTUAL CLASSROOM | WEB-APP USING PYTHON-DJANGO

March 2018 - May 2018

- Created a 'Virtual Classroom' where students can enroll, view and download course content.
- Content includes videos, presentations, notes, etc. which may be posted by faculty only. Questions may be asked and answered by students.
- Responsible for designing and implementing back-end system for the project.

GLOBAL VOLUNTEERING

Leadership Development | AIESEC Global Exchange Program

May-July'18	Kharkov, Ukraine	Quality Education For Everyone
May-July'17	Hefei, China	Sustainable Cities And Communities
